

ILLUMINATE STRATHCONA

IMPROVING SAFETY AND SUSTAINABILITY

The Strathcona BIA is launching a **grant program for property and business owners** who want to better illuminate their buildings and adjacent streets. This program will help **improve building security, sustainability, and aesthetics**, while enhancing the comfort level at night for all who visit, work, and live in our neighbourhood.

Grants are available for:

Option 1

Replacement or new exterior LED lighting on buildings

We'll cover 50% of costs, up to \$1500

How it works:

Work with SBIA recommended vendor, **Relight Solutions** to receive a free assessment and quote for LED lighting upgrades

Provide a quote of the proposed work from Relight or another licensed vendor in a simple online application to get approved for a grant: bit.ly/IlluminateStrathcona

Grants will be provided for exterior lighting upgrades and new installations and paid upon completion of work and presentation of receipts to the SBIA

TO GET STARTED, CONTACT RELIGHT

sales@relightsolutions.com

Option 2

Upgrading adjacent public street lamps to LED light fixtures

We'll cover 50% of costs per block, up to \$2000

LED lighting upgrades in public street lamps are not within current City operational budgets, and require additional funding

Determine if any neighbouring properties/businesses are interested in contributing to upgrading to LED lights on your block with SBIA support

The SBIA will support scheduling the installation of new LED street lights with City crews, collecting funds from contributing businesses, and covering 50% of costs per block, up to \$2000
